

Cabinet Cooling Systems

Protect your wine investment. Wine Guardian units are the **strongest and most energy-efficient** wine cellar cooling systems on the market. They provide **optimal temperature and humidity control** for both commercial and residential cellars and wine cabinets with a design that allows for easy installation and operation.

This Wine Guardian cabinet cooling system was specifically designed to be integrated into a wine cabinet. The system is a professional grade, self-contained climate control system for regulating the temperature of a wine cabinet, wine display, or wine showcase at either aging temperatures or any serving temperature (41-64°F / 5-18°C).

*Note: Cooling unit does not come with a cabinet.
Contact a distributor for more information.

- 1 Versatile**
Unit can be installed on the top or the bottom of the cabinet
- 2 Comprehensive**
Extended range of temperature and humidity control
- 3 Efficient**
Completely self-contained and includes an integral air cooled condenser
- 4 Strong**
Features an all aluminum chassis, and contains a coated evaporator coil to ensure product durability

Switzerland

Wine is your passion. *Preserving it is ours.*

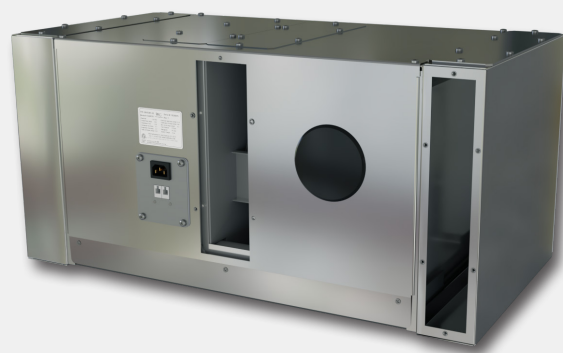

Versatile

Unit can be installed on the top or the bottom of the cabinet.

Comprehensive

Our cooling systems offer a **wide range of control**, so you can match our units to your specific needs. Up to 3 optional remote sensors and 2 remote interface controllers with Wireless2Base™ technology can be added to your unit for easy monitoring and control of your cabinet.

The cabinet cooling system comes standard with the serving-temperature option. Our system can control an extended temperature range from 41°F(5°C) to 64°F(18°C). Serving-temperature allows the user to rotate wine stock and change the set point from season to season, making it ideal for restaurants, wine bars, clubs, etc.

Efficient

The cabinet cooling system is completely self-contained and includes an integral air-cooled condenser. No ductwork or drain line required.

Strong

The cabinet is constructed of aluminum for corrosion protection and maintenance-free appearance. It also contains coated coils to ensure **product durability**.
