

Wall Mounted Wine Racks Assembly Instructions

Applicable for same type of wall mounted wine racks

1. Parts included

- 1 Bottle Neck Holder Strip (A)
- 1 Bottle End Holder Strip (B)
- Toggle Bolts
- Screws
- Plastic Screw Hole Covers
- Drywall Plugs

2. Parts included

- 1 Tape Measure
- 1 Screwdriver
- 1 Level
- 1 Pencil for marking

Drywall plugs

Screws

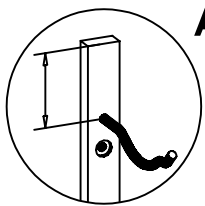

Screw hole caps

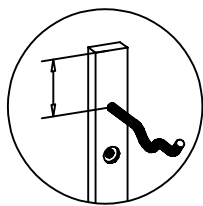

3. Instruction Steps

1. Choose Bottle Direction:

Two different holder strips, one for bottle end (A) and one for bottle neck (B).

A

B

2. Layout:

- Strip A/B should be marked $2\frac{3}{4}$ inches away from nearby walls or obstructions.
- Measure $7\frac{1}{2}$ inches from Strip A to Strip B.
- For multiple columns, recommended distance between two racks is $5\frac{1}{2}$ inches

2. Fastening bottle supports to wall:

- (1) After layout is completed, use a level to ensure Bottle Support Strips are vertically level before mounting.
- (2) Fasten toggle bolt and screws to wall through the pre-drilled mounting holes in Bottle Supports Strips. Please note to use drywall plugs when installing screws to protect wall.
- (3) Use screw hole caps to cover screw holes once all Bottle Support Strips are secured.
